

Unit 2 Key Terms

Aquaporin	Hypotonic
Cell	Isotonic
Cell membrane	Levels of organization
Cell Specialization	Lipid bilayer
Cell Theory	Lysosome
Cell wall	Mitochondria
Centriole	Nucleus
Chloroplast	Organ
Concentration gradient	Organ system
Cytoplasm	Organelle
Cytoskeleton	Osmosis
Diffusion	Osmotic pressure
Endocytosis	Phospholipids
Endoplasmic reticulum	Prokaryote
Eukaryote	Receptor
Exocytosis	Ribosome
Facilitated diffusion	Selectively permeable
Golgi apparatus	Tissue
Homeostasis	Vacuole
Hypertonic
